

test

“

Preferential origin refers to the economic nationality of a product as determined under the terms of a **preferential trade agreement (PTA)** between two or more countries. It establishes whether a product qualifies for **preferential (reduced or zero) customs duties** upon importation into a partner country.

Unlike non-preferential origin, which determines general origin for trade statistics or labelling, *preferential origin* is specifically used to access **preferential tariff treatment** under free trade agreements (FTAs), association agreements, or economic partnership agreements.
